

# The Oracle JD Edwards Cloud

From EOH Oracle Services

## GET THE POWER OF JD EDWARDS MINUS THE COST OF TECHNOLOGY.

You no longer have to fund an entire IT department to enjoy using one of the world's most advanced Enterprise Resource Planning (ERP) systems. That's because things work differently in the Oracle JD Edwards Cloud, a product of EOH Oracle Services.

At EOH Oracle Services, we've taken care of the IT for you. Our secure data centre has all the hardware, software, and IT staff you'll need to get your work done. And because we use Cloud computing technology, you can rent them over the Internet on a metered, pay-per-use basis.

With the Oracle JD Edwards Cloud, you'll be able to run your company efficiently without worrying about complex licensing, installation, support, or software patches. It's all included in a simple monthly per-use payment.

You'll also find that upgrades go quicker while costing less, meaning you'll have more immediate access to the latest and greatest software.

Now, using JD Edwards is just like using the Web. Switch on, log in, and start working. It couldn't be simpler – or more cost-effective.

## Why the Oracle JD Edwards Cloud?

### Hosted by EOH

You've chosen one of the top IT companies in South Africa as your Cloud computing partner. EOH is a JSE-listed enterprise with the resources and experience at its disposal to bring you the very best in IT technology. We host the Oracle JD Edwards Cloud at the EOH data centre, a secure facility with enough hardware, software, and IT staff to meet your business needs.

Systems make it possible...  
People make it happen

## Managed by EOH Oracle Services

The Oracle JD Edwards Cloud is a product of EOH Oracle Services. We're some of the brightest, certified Oracle, IT, and business experts in the country. We're also an Oracle Platinum Partner – the highest level of certification that can be awarded. So you'll be in good hands, and you'll have access to technical advisors who support customers over three continents on different Oracle Technologies from South Africa.

## Built on Oracle

Our Cloud computing system is built entirely with software from Oracle – one of the top three computer companies in the world – running on robust industry-standard hardware. And because it runs in the EOH Cloud, you'll get the benefit of a stable, reliable, and fast Cloud computing service, which means your business will be stable too.

## Security first

We've invested heavily in the best security techniques, technologies, and minds in the business, to make sure that access to your data is restricted to you alone. Our data centre is closely guarded by security personnel, biometric protection, strict protocols, and CCTV, both inside and out. You couldn't find better – especially on your own premises.

## Compliance and protection

We follow international standards, such as ITIL, to make sure that your data is protected and managed in such a way that its integrity always remains intact. You'll find our practices and methods satisfy legal and ethical requirements like Sarbanes-Oxley and King III.

## Pay-per-use

If you want to fly, the cost of the plane is included in your fare, divided among all the passengers. So why pay for an entire IT system? We'll supply the hardware, software, and staff. You just pay for computing.

## Adjustable IT

A Cloud is a flexible computer system that grows or shrinks with your workload. Decide how much computing power you need versus how much you want to pay. Now make your adjustments instantly with an easy-to-use management system. You've just resized your IT – and your costs.

## Upgrades

Upgrades can be done with less effort at a lower risk and lower cost to the customer. Our sophisticated cloud solution will cater for R&D environments where upgrades and patches will be tested before deploying it to live customer sites.

## Best for the bottom line

While you can't see all the resources we make available to you, you will see the result in your bottom line. Without the capital investment, operating expenses, and time wasted on owning an IT system, you'll have more to spend on what really matters: the business you're in.

With the Oracle JD Edwards Cloud from EOH Oracle Services, you'll get all the power of JD Edwards minus the cost of the technology required to run it. Contact us today for a free, no-obligation consultation.
